Product information

Shoe color: black

Shoe width: W (Wide)

The WARRIOR Alpha Pro Wide SR is designed for ambitious ice hockey players who are looking for a secure footing on the ice, efficient power transfer, and noticeable comfort. The wide W-last provides more room in the forefoot area, while the sturdy boot securely supports the foot during intense changes of direction and regular training sessions.

- Product Type: Ice hockey skates for senior players
- Fit: W, wide version with extra volume
- Construction: Sturdy boot for support and stability
- Interior: Comfortable padding for a pleasant fit
- Skating experience: Direct power transfer and high control
- Usage: Practice, games, and open ice sessions
- Color: Black
- Sizes: EU 42 to 48 / Skate Size 7 to 12

Club players who hit the ice several times a week especially benefit from the combination of a secure fit and a sporty skating experience. The boot remains comfortable even when a session runs longer or the pace picks up. Thanks to its precise fit, the skate works in close harmony with the foot, which provides noticeable support during takeoffs, turns, and quick stops. The wide SR version is particularly appealing if narrower models feel too tight in the forefoot.

When selecting a skate, width is just as important as length to ensure that support and comfort on the ice go hand in hand.
