Product information

Color: black

Stick size: SR

The WARRIOR COVERT QR5 PRO SR is a composite hockey stick designed for players who want to release the puck quickly and seek a direct feel in tight game situations. Especially during regular practice and at higher levels of play, what matters is how cleanly the stick transfers energy and how clear the contact with the puck remains. That's exactly where this model excels, with its lightweight, durable shaft and distinctive tapered design.

- Technology: hexagonal taper shape
- Functionality: efficiently stores energy for a faster shot release
- Blade: redesigned FUELCORE ULTRA blade
- Puck feel: improved feedback through the shaft and blade
- Shooting performance: more rebound and a livelier finish
- Curves: M03, M28, W03, W28
- Hardness: 65, 75, 85, 100
- Variant: SR, black, left or right

On the ice, the design really shines during fast finishes, direct shots, and wrist shots. The tapered geometry supports rapid energy transfer, while the FUELCORE ULTRA blade makes puck contact feel more precise. This is especially helpful for club players and performance-oriented senior players who, when playing at high speeds, don't want to have to think about their stick first but rather want to rely on timing, puck control, and finishing.

When selecting a stick, pay attention to the appropriate blade orientation, the desired curvature, and a stiffness that suits your playing style.
