Product information

Color: black

Stick size: INT

The WARRIOR NOVIUM PRO INT is a lightweight composite hockey stick designed for ambitious youth and club players who seek a direct feel and quick reactions during play. As the lightest shaft in the Warrior stick family, this model is designed for high-speed play. The new Bevel Taper, with its redesigned shape, supports controlled stick handling and helps players load shots cleanly and powerfully.

- Product Type: Composite hockey stick in size INT
- Technology: Bevel Taper with a newly developed shape
- Construction: lighter carbon fibers with thermoplastic epoxy resin
- Playing feel: Designed for speed, puck feel, and control
- Curvature: W03 or W28
- Stiffness: 55 or 63
- Blade orientation: Left or right
- Color: black

Especially at the INT level, a lightweight stick often makes a noticeable difference: quick hands along the boards, more direct handling when building plays, and better feel when carrying the puck. The combination of reduced weight and the distinctive taper is designed for players who use their stick actively and expect precise feedback when shooting as well as during ball or puck control. This makes this model particularly well-suited for regular training and intense match play.

When selecting a stick, pay attention to the blade orientation, curvature, and stiffness to ensure that the stick's feel and shooting performance match your playing style.
