Product information

Color: black

Stick size: SR

The WARRIOR QR6 TEAM SR is a composite hockey stick designed for senior players who are looking for a quick release and a direct feel for the puck during practice and games. For regular club players in particular, the combination of lightweight construction, a sturdy shaft, and a responsive blade makes a noticeable difference during quick shots and fast passes.

- Technology: QR Edge Taper for enhanced power transfer and a fast release
- Construction: Minimus Carbon UD with unidirectional carbon fibers
- Material: T.L. 133 carbon construction with lightweight fiber technology and epoxy resin
- Blade Core: FuelCore polymer core for direct puck feel and reduced material fatigue in the blade
- Shaft Shape: O.G. Shaft Shape
- Curvature: W02, W03, or W28
- Hardness: 70, 75, or 85
- Variant: SR, left- or right-handed, in black

The angled taper in the hosel efficiently channels energy through the lower shaft, which is particularly helpful for quick wrist shots and tight playing situations. Added to this is the lightweight carbon construction, which keeps the stick agile without sacrificing stability. The FuelCore blade provides a crisp feel upon puck contact, which matters for receiving passes, short passes, and shots under pressure. In the senior version, this model is well-suited for players who use their stick regularly in everyday club play and prefer a modern, responsive setup.

When selecting a stick, pay attention to the blade orientation, desired curve, and appropriate flex.
