Product information

Color: black

Stick size: SR

The WARRIOR QR6 REV SR is a composite hockey stick designed for senior players seeking a quick release with direct feedback. It's especially during regular practice and games that you can really see how much of a difference a cleanly tuned taper, a lightweight carbon layup, and a precise blade can make.

- Technology: QR Edge Taper for fast energy transfer through the hosel
- Material: Minimus Carbon UD with unidirectional carbon fibers
- Construction: T.122 design for balance, stability, and durability
- Blade: FuelCore polymer core for direct puck feel and powerful shots
- Shaft Shape: O.G. Shaft Shape with flat sides and rounded corners
- Curvature: W03 or W28
- Stiffness: 75 or 85
- Variant: SR, black, left- or right-handed

The angled QR Edge Taper promotes a quick release, which is especially noticeable when time is short during a shot or when passing under pressure. Added to this is the lightweight Minimus Carbon UD, which keeps the stick agile without compromising stability. The FuelCore in the blade provides a crisp feel for the puck and helps you load shots cleanly and release them with control. Thanks to the O.G. shaft shape, the stick feels familiar in your hand—a feature that particularly appeals to club players who train regularly and value direct handling.

When selecting a stick, pay attention to the appropriate stiffness, blade orientation, and the desired curve (W03 or W28).
