Product information

Color: black

Stick size: SR

The WARRIOR QR6 PRO SR is a composite hockey stick designed for experienced senior players seeking a direct shot release and a lightweight feel. Especially during regular practice and in tight game situations, the speed at which energy can be stored and released is crucial.

- Technology: Minimus Carbon 25 with a flat, spread-out carbon weave
- Construction: thin and lightweight, yet resistant to damage
- System: QR Edge Taper for rapid energy transfer in the hosel area
- Blade: Edge Blade with revised geometry for easier loading during quick shots
- Core: lightweight polymer core with Minimus Carbon 25 coating
- Feel: Improved puck feel with a weight-relieving effect in the blade area
- Variants: Flexes M03 MAX, M28, M28 MAX, W03, W28
- Specifications: SR, hardness levels 70, 75, 85, 95, left- or right-handed, black

The combination of QR Edge Taper and Edge Blade is clearly designed for players who want to handle the puck quickly and take shots without a long wind-up. The carbon layup keeps the stick lightweight without unnecessarily sacrificing stability. This is complemented by a crisp feel for the puck that remains noticeable during passes, puck control, and quick shots.

When choosing a stick, the most important factors are the appropriate stiffness, the desired flex, and whether it's left- or right-handed, depending on the blade orientation.
