Product information

Color: black

Stick size: JR

The WARRIOR NOVIUM PRO JR is a lightweight composite shaft designed for young players who need quick hands, direct ball feel, and precise control during play. Within the Warrior shaft family, this shaft features a particularly lightweight construction. The combination of modern carbon construction, lighter fibers, and thermoplastic epoxy resin is designed for junior players looking for a responsive setup during practice and games.

- Product Type: Junior Hockey Stick
- Technology: lightweight construction with modern carbon fibers and thermoplastic epoxy resin
- Taper: Bevel Taper with a newly developed shape
- Playing feel: Designed for speed, feel, and control
- Curvature: W03 or W28
- Stiffness: 40 or 50
- Stick type: left-handed or right-handed
- Color: black

Especially at the junior level, a lightweight shaft often makes a noticeable difference on the field: passes flow smoothly, ball control feels more direct, and the stick remains responsive in your hand during quick shots. The newly shaped Bevel Taper enhances control while also providing greater power transfer during the shooting motion. This is particularly well-suited for ambitious young players in club settings who are transitioning from a simpler shaft to a more athletic model.

When making your selection, the most important factors to consider are the appropriate shaft stiffness, your preferred bend (W03 or W28), and the correct side.
