Product information

Color: red

WARRIOR ALPHA ONE PRO RED is a hockey helmet designed for players who are looking for a lightweight model with a clear focus on protection for regular practice and games. The one-piece plastic shell keeps the weight low while remaining sturdy. It is complemented by strategically placed IM PAX FOAM padding on the temples, back of the head, and forehead—the areas where additional cushioning is often needed on the ice.

- Product Type: Hockey Helmet
- Construction: one-piece plastic shell with lightweight design
- Technology: IM PAX FOAM
- Protection areas: Temples, back of the head, and forehead
- Functionality: Absorbs linear and rotational forces of varying intensities
- Adjustment: 270° AdaptFit
- Ventilation: Optimized air circulation through the shell
- Care: Pads are washable and can be purchased separately

The combination of light weight, adjustable fit, and improved ventilation really makes a difference, especially during intense training sessions. The helmet is easy to put on without adding unnecessary bulk and remains comfortable even as the pace of training picks up. This is especially important for club players and ambitious youth players, because in hockey, a helmet should not only provide protection but also remain comfortable to wear consistently during extended periods on the ice.

Available in red and in sizes M and L, in the JR and SR models.
