Product information

Color: white

Stick size: JR

The WARRIOR ALPHA DLUX PRO WHITE JR is a junior hockey stick designed for young players who are looking for a direct feel for ball control, passing, and shooting during practice and games. The white design has a clean, sporty look, while the selection of curve, stiffness, and stick-hand allows for precise customization to match playing style and skill level.

- Product Type: Junior Hockey Stick
- Model: Alpha Dlux Pro
- Color: White
- Curvature: W03 or W28
- Stiffness: 30, 40, or 50
- Stick Type: Left or Right
- Shaft size: JR
- Length: 55 inches

Especially at the junior level, the right stick setup often makes a noticeable difference. A softer stick helps younger or lighter players load the stick cleanly, while stiffer sticks provide more resistance for stronger young players. The choice between W03 and W28 is also crucial for achieving the desired feel for the ball, especially during fast-paced combinations indoors or when taking repeated shots during club practice. This allows the stick to be tailored more closely to the player's individual style than with simple standard models.

Key factors in making your selection include choosing the correct stick side, your preferred curve, and a stiffness that matches your age, strength, and skill level.
