Product information

Protection size-1: SR

WARRIOR ALPHA LT SR is a senior shoulder protector designed for ice hockey players who regularly experience physical contact on the ice and are looking for lightweight, flexible gear. This model combines targeted protection in key areas with a close-fitting design, without falling into the category of the most expensive top-of-the-line models.

- Product Type: Senior Shoulder Pads for Ice Hockey
- Technology: compression-molded EVA-IMPAX foam
- Protection areas: strategically placed protection on the shoulder caps and sternum
- Fit: Close-fitting lay-flat strap system
- Mobility: Lightweight design for unrestricted movement during play
- Ventilation: Dynamic Ventilation
- Age group: SR
- Sizes: S, M, L

In everyday hockey play, the difference is most noticeable when speed, physical battles, and tight game situations come together. The IMPAX foam is positioned where impacts and contact are most critical, while the flat strap system keeps the shoulder pads snugly against the body. As a result, the gear stays comfortably secure even during quick changes of direction, along the boards, or in forecheck-oriented play. Dynamic Ventilation also promotes a more breathable feel during intense practices and long games.

When choosing a size, it's worth taking a close look at the fit across the shoulders and chest to ensure that protection and mobility work well together.
