Product information

Protection size-1: JR

WARRIOR ALPHA DX3 JR is a shoulder protector for youth players, designed for athletes who want a snug fit, noticeable protection, and freedom of movement during practice and games. Especially in junior sizes, it's important to have gear that works with you instead of restricting your movement.

- Product Type: Shoulder pads for ice hockey
- Agegroup: JR
- Protection area: Molded sternum protection
- Padding: Dual-density foam padding
- System: Ventilatel System with breathable inner jacket
- Inner material: "Strike yellow" liner, quick-drying
- Fit: Designed for mobility and a close-fitting feel
- Sizes: S, M, L

The combination of molded protection in the sternum area and multi-layered foam padding keeps the weight pleasantly low while maintaining flexibility in the areas where young players need to execute rotations, stickwork, and tight one-on-one battles cleanly on the ice. The inner jacket supports the close-fitting design and, thanks to its breathable construction, ensures that the protective gear feels less heavy and stuffy even during intense practice sessions. The quick-drying inner material also contributes to this, helping to keep the player dry and comfortable.

When it comes to junior gear, it's worth taking a close look at the right size to ensure that protective areas fit properly and freedom of movement is maintained.
