Product information

WARRIOR ALPHA LITE SR is an elbow pad designed for senior players who are looking for lightweight, flexible gear for practice and games without sacrificing targeted cushioning in key impact zones. Especially during intense shifts, battles along the boards, or quick stick movements, it's important to have protection that fits snugly and doesn't get in the way.

- Technology: compression-molded EVA IMPAX foam in key impact zones
- Construction: perforated, lightweight, and contoured protective panels in the forearm and elbow areas
- Fit: Specially designed elbow pocket for a secure fit
- Closure: Sling Wrap strap system with Fantom Stretch
- Comfort: Flat-lying straps that are easy to handle
- Practical benefits: Straps do not snag on socks
- Size: SR

In everyday hockey play, this design really shines when mobility and a secure fit need to go hand in hand. The contoured elements follow movement more naturally than simple standard padding, while the EVA foam provides support where contact is typically more direct. The Sling Wrap system keeps the elbow consistently in position, which is especially comfortable for club players with regular ice time.

When selecting a size, the senior size should match the rest of your protective gear and the desired fit on your arm.
