Product information

WARRIOR ALPHA LT JR is a shin guard designed for young athletes who need reliable protection with noticeably greater comfort during practice and games. The new design features additional coverage in the slash and calf areas without feeling unnecessarily heavy.

- Technology: compression-molded IMPAX foam in key impact zones
- Protection Area: New perforated, lightweight, and contoured slash and calf guards
- Inner padding: removable with a floating Sub-Cell knee area
- Fit: Specially developed shape with a secure, comfortable fit
- Closure: Sling Wrap strap system with Fantom Stretch
- Straps: Lay Flat straps that lie flat against the skin
- AgeGroup: JR

For young players in particular, it's important that a pad not only provides protection but also remains comfortable during long shifts on the ice. The removable inner padding and the free-floating knee area help reduce pressure points and maintain full range of motion. At the same time, the molded protective elements, together with the IMPAX foam, provide solid coverage in areas that are particularly prone to impact in hockey. The redesigned strap system securely fastens the pad, while the flat-lying straps remain easy to use when putting on the pad and don't snag on the socks.

For optimal performance, the JR size should match the player's height and the rest of their protective gear.
