Product information

Protection size-1: SR

WARRIOR ALPHA PRO SR is an elbow guard for seniors designed for ambitious players and intense use during practice and games. Key features include an anatomical fit, targeted cushioning in high-impact areas, and a closure system that stays securely in place even during vigorous movement.

- Technology: compression-molded EVA IMPAX foam
- Protection area: key impact zones on the elbow and biceps
- Fit: anatomically contoured design
- Closure: Sling Wrap closure system
- Comfort: Secure fit with high comfort during gameplay
- Age group: SR
- Sizes: XS, S, M, L

It's especially during tight one-on-one situations, contact against the boards, or when falling onto the ice that you realize how important a perfect balance of protection and mobility is. The EVA IMPAX foam is positioned exactly where hits and impacts typically occur, without unnecessarily restricting movement. Added to this is the bicep guard featuring the same foam technology, making the overall package particularly well-suited for performance-oriented field players. The Sling Wrap system keeps the pad close to the arm, ensuring a stable feel even during quick changes of direction and long playing sessions.

When selecting a size, it's especially important to choose the right fit so that the elbow pad and bicep guard sit snugly.
