Product information

Protection size-1: JR

WARRIOR ALPHA PRO JR is an elbow guard for youth players, designed for athletes who want to combine noticeable protection with a snug fit during practice and games. The Alpha line is aimed at ambitious junior players for whom arm mobility is just as important as a secure fit.

- Technology: compression-molded EVA IMPAX foam
- Protection area: key impact zones on the elbow and bicep area
- Fit: Anatomical shape for a natural fit on the arm
- Closure: Sling Wrap closure system for a secure fit
- Comfort: snug, comfortable fit during in-game movement
- Agegroup: JR
- Size: S, M, or L

Especially in junior hockey, an elbow pad must not only provide protection but also function smoothly during stick handling and in tight game situations. The EVA IMPAX foam is positioned where hits and impacts typically occur, while the anatomical design snugly wraps around the arm. Added to this is the Sling Wrap system, which keeps the pad securely in place even during quick changes of direction. This results in a more direct feel during movement than with simple, loose-fitting models.

To help you choose, select the appropriate JR size—S, M, or L—to ensure that the elbow and bicep areas are properly covered.
