Product information

Protection size-1: JR

WARRIOR ALPHA PRO BLACK JR is an elbow pad designed for youth players that effectively combines mobility and protection. Especially during regular practice and games, it's important to have a fit that stays secure without restricting movement when using the stick, during one-on-one battles, or during quick changes of direction.

- Product Type: Hockey elbow pads
- AgeGroup: JR
- Sizes: S, M, L
- System: Sling Wrap with Fantom Stretch
- Fit: Elbow pocket for a stable and comfortable fit
- Cuff: War-Tech Sleeve made of stretchy material
- Protection Area: Max Protect with additional foam padding in key impact zones
- Closure: Lay Flat Straps, lie flat and are easy to use

The design is engineered to snugly encase the elbow and keep the pad securely in place even during vigorous movement. This is particularly noticeable among young club players, whose equipment needs to reliably withstand multiple practices per week. Additional protective elements in the slash and bicep areas supplement the padding in places where quick contact and impacts are more common in hockey. At the same time, the straps lie flat against the arm so that nothing gets in the way or snags on the jersey while changing or on the ice.

For optimal protection, the JR size should be chosen so that the elbow fits snugly in the designated pocket.
