A flexible glove construction is especially noticeable in youth hockey: stick handling, passing, and shooting feel more natural without unnecessarily restricting the wrist. The AXYFlex cuff and flexible thumb support exactly this playing feel, while the anatomically shaped back of the hand, together with the elastic inserts, ensures a snug, game-ready fit. This is ideal for juniors in their everyday club and training routines, where technique and confident handling are paramount.

When choosing a size, it helps to consider the player's existing equipment and the desired fit within the junior range.
