Product information

Goalkeeper color: white

Goalkeeper size: SR

WARRIOR G7 RTL SR are goalkeeper leg pads designed for ambitious goalies who want to combine quick movements in goal with a sturdy construction during practice and games. Available in white and size SR, this model is designed for adult goalies who prioritize controlled rebounds, smooth gliding, and a reliable knee area.

- Technology: HyperComp carbon composite material in the thigh area and Knee Drive System
- Construction: Reinforced thigh area with high-density impact foam
- System: Knee Drive System with a wide, soft knee pad
- Adjustment: Removable strap behind the knee and knee wings
- Sliding performance: Polycarbonate SlidePlates on each knee pad to reduce friction
- Training benefits: Supports quick changes of direction between the posts
- Size: SR
- Color: white

The difference compared to simpler pads is especially noticeable during intense training sessions: The reinforced construction in the upper area gives the leg guard more substance without feeling unnecessarily heavy. HyperComp helps keep the weight in check while simultaneously supporting long-term rebound performance. The Knee Drive System ensures a stable, soft fit in the butterfly position, while the SlidePlates noticeably facilitate lateral movement on the ice. This is particularly important for goalies who frequently react while in motion and want to track the puck cleanly in the crease.

When making your selection, the most important factors are choosing the right senior size and ensuring the desired range of motion in the knee area.
