| Stick size:                   | SR        |

The WARRIOR M3 RTL SR is a lightweight goalie stick designed for goalies who are looking for quick hands, clean passes, and a direct feel for the stick during practice and games. The asymmetrical shaft geometry ensures a stable grip, while the low kick point supports quick reactions in the net.

- Product Type: Ice hockey goalie stick
- Technology: Minimus construction with a low kick point
- Construction: Asymmetrical shaft geometry for controlled handling
- Material: Paddle and blade made of Minimus Carbon 25, shaft made of Minimus UD
- Grip: SlideGrip technology
- Curve: TWT Curve
- Size: SR
- Finish: Regular, color black

For goalies in regular action, a stick that remains lightweight yet feels sturdy in the paddle area and on the blade is especially important. The carbon construction reduces unnecessary weight, which is noticeable during rebounds, stick saves, and quick position changes in front of the net. Added to this is the SlideGrip surface, which provides more control when changing positions and handling the stick without restricting the feel of movement. Mirror-chrome details and the glossy finish on the paddle and blade create a striking look and provide additional surface protection.

When selecting a stick, in addition to the SR size, it's especially important to choose the correct Regular model and the desired curvature.
