IH Grip Spray is a grip spray for hockey sticks that provides a more secure grip on the shaft when your grip starts to slip during practice or a game. Especially during regular sessions indoors or on the field, this spray helps you hold the stick more securely without having to make unnecessary changes to your equipment.

- Product Type: Stick Grip Spray
- Application: Hockey sticks / shaft grip
- Function: to refresh the grip on the stick
- Benefits: Helps ensure a secure grip during practice and games
- Contents: 100 ml
- Package Contents: 1 spray can or spray bottle, depending on the model

A grip spray is a practical addition to stick care, especially for club players and coaches who use their equipment regularly. It’s ideal when the stick starts to feel smoother after many sessions or when the direct grip sensation diminishes. This helps keep your hand steadier on the stick, which can make a noticeable difference in ball control, receiving, and quick changes of direction. Unlike basic care products, the focus here isn’t on cleaning but on enhancing the grip.

Before applying the spray, it’s worth taking a quick look at the grip tape and the shaft’s surface to ensure the spray is compatible with your current setup.
