Accessory size: 10 mm

The EXEL POWER ROLLER FERRULE (10 mm) is a compatible replacement part for roller ski or pole setups where a snug-fitting pole tip is essential. Especially during regular training, it's worth having a ferrule that fits the existing shaft size and allows for easy replacement.

- Product Type: Ferrule for pole tips
- Size: 10 mm
- Application: Replacement or exchange on compatible poles

Product information

- Fit: Designed for a shaft diameter of 10 mm
- Package contents: 1 pair

In hockey and endurance training—whether on wheels or on solid ground—intact tips are essential to ensure the stick remains in proper working order. A ferrule of the correct size ensures that the tip fits securely on the shaft and that the stick can be handled reliably during training. This is particularly practical for club athletes, coaches, or teams that regularly maintain their equipment and specifically replace worn-out parts, as it eliminates the need to replace the entire stick right away.

Before installation, it's recommended to briefly check the existing shaft measurement to ensure the 10-mm version fits the stick.
