Skid size: 287

Stock type: Right

The CCM PROFORMANCE LITE blade is a replacement blade for ice hockey and is primarily designed for players who train and play regularly and who want to ensure a precise fit when replacing their blades. The 287 mm right-side version of this model is ideal for specifically replacing an existing blade when the fit and setup need to be just right.

Product information

- Product Type: Replacement blade for ice hockey skates
- Model: Proformance Lite
- IntendedUse: Replacing an existing blade for everyday hockey play
- Seiter: right
- Blade size: 287 mm
- Design: Single blade

A suitable replacement blade is especially important in everyday club play when equipment needs to be back in action quickly or a worn-out blade needs to be replaced. The Proformance Lite from CCM is designed for this practical purpose: the same length, clear side alignment, and a design intended to integrate seamlessly into an existing setup. This is particularly relevant for players who have grown accustomed to a familiar skating feel and do not want any unnecessary changes when replacing blades.

Before making your selection, check the blade length of 287 mm and ensure compatibility with your existing skate frame.
