More than 10 in stock

Brand: EXEL

EXEL NW AERO TIP is a single pole tip for EXEL Nordic walking poles. These wear parts are particularly important during regular training because they make direct contact with the ground and thus help determine the feel of movement and ensure proper pole technique. For active walkers, clubs, or schools, a suitable replacement part is therefore often a more immediate priority than a completely new pole.

- Product Type: Replacement tip for Nordic walking poles
- Brand: EXEL

Product information

- Model: NW AERO TIP
- Intended use: Nordic walking on standard training trails
- Package contents: 1 piece
- Note: For replacing a worn or damaged tip

Especially with walking poles that are used frequently, having an intact tip makes a noticeable difference in everyday use. The pole makes clean contact with the ground, your stride remains smooth, and the material isn't subjected to unnecessary wear. If you're part of a club or do multiple training sessions per week, it's therefore worth replacing wear parts in a timely manner rather than waiting until they're significantly worn.

Before replacing the tip, briefly check to make sure it fits your existing EXEL pole.
