EXEL OEB QR GRIP is a replacement grip for hockey sticks and is designed primarily for players who train and play regularly and who don't want to compromise on grip feel. A fresh grip really makes a difference when you need the stick to sit securely in your hand and remain consistently controllable even during frequent ball contact.

- Product Type: Replacement grip for hockey sticks
 - Model: QR GRIP
 - Applications: Field hockey and floorball, depending on the stick and grip wrap
 - Benefits: Restores the grip feel and ensures a secure hold on the stick
 - Contents: 1 piece
-

Product information

Especially in everyday club play, the grip is often subjected to more wear and tear than initially expected. Sweat, frequent training, and the constant switching between technique, passing, and shooting leave noticeable marks over time. With the EXEL OEB QR GRIP, you can restore your stick's handling to something closer to what you're used to. This is especially important for players who are conscious of their stick feel and don't want to wait until the grip starts to slip before making adjustments to their equipment.

Before replacing the grip, it's worth taking a quick look at your preferred wrapping style and the appropriate length of the existing shaft section.
