## Product information

---

ice skating, providing a more dynamic riding experience than a standard rigid chassis.

- System: MARSBLADE O1 with flexible rocker construction
- Product Type: Off-ice inline chassis for hockey training
- Training benefits: supports balance, edge control, and skating-specific movements off the ice
- Age group: YT, tailored for youth players
- Size: Skate Size 1
- Fit: Width D (Regular)
- Fit: matches the specified YT shoe size

A natural sense of movement is especially important for young players, ensuring that technical training remains effective even outside of ice time. The MARSBLADE chassis supports exactly this transition: not as a rigid wheeled solution, but with a design that more closely mimics skating. This is particularly appealing for young players in club training and for parents looking for a hockey-like training foundation for the off-ice season.

When selecting a pair, Skate Size 1, the YT shoe size, and the standard width D should match the player's existing shoe.
