Accessory size: S

The MARSBLADE CHASSIS R1 COMPLETE in size S is an inline hockey chassis designed for players seeking a more agile skating feel during off-ice training. The R1 design is known in the hockey world for its rocking motion and brings the skating experience closer to the dynamics on the ice. This complete set includes wheels and ball bearings.

- Product Type: Complete inline hockey chassis
- System: Marsblade R1 with flexible chassis construction
- Riding feel: rocking motion with handling similar to ice hockey

Product information

- Applications: Off-ice training and inline hockey
- Size: S
- Package Contents: Frame including wheels and ball bearings

A chassis that not only rolls straight but also better accommodates the active movements of hockey is particularly appealing to club players and ambitious young players. This is noticeable during edge changes, when applying pressure on the first steps, and during exercises where rhythm and balance play a key role. As a complete unit, this set makes it easy to assemble a ready-to-use inline setup without having to separately adjust the wheels and ball bearings.

It's important to ensure the right fit for the shoe being used so that the assembly and sizing align properly.
