Product information

Shoe size Skate Size: 5.5

The TRUE CATALYST 5X4 INT in skate size 5.5 is designed for ambitious ice hockey players who are looking for a snug, anatomical fit during practice and games. The modern shell construction is designed to conform to the shape of the foot, promoting comfort, stability, and direct power transfer to the ice.

- Product Type: Ice hockey skates for field players
- Construction: modern shell construction with an anatomical shape
- Fit: Designed for a snug and stable fit
- Feel: supports speed, agility, and controlled changes of direction
- IntendedUse: competitive training and games
- Size: Skate Size 5.5

Especially during intense sessions, a skate that keeps the foot securely in place and accommodates movements without noticeable energy loss really makes a difference. This is exactly where this model excels: The anatomical design promotes a precise skating feel, while the stable base aids in acceleration, edge work, and quick reactions in tight spaces. This is particularly appealing for intermediate-level club players who don't want to make any unnecessary compromises between comfort and athletic responsiveness.

When choosing the right skate size, it's worth taking a close look at the length and shape of your foot, as the fit is intentionally designed to be snug.
