Product information

Shoe size Skate Size: 7.5

Shoe width: S

Shoe size: SR

The TRUE CATALYST 9 SR is an ice hockey skate designed for performance-oriented players who are looking for a snug fit with noticeably more freedom of movement during regular practice and games. In the SR version, skate size 7.5, and width S, this model is designed for narrow feet and for players who appreciate the snug fit of a sport-tuned boot.

- Technology: thermoformable NEUROFIT+ shell
- Construction: one-piece carbon fiber boot
- Stiffness: moderate shell stiffness
- Functionality: dynamic flex tendon protection
- Range of motion: greater freedom of movement
- IntendedUse: Elite-level ice hockey
- Fit: Inspired by the TRUE Custom concept
- Size: SR / Skate Size 7.5 / Width S

The one-piece construction keeps the foot snugly integrated with the skate, which promotes a precise feel on the ice during turns, acceleration, and sharp changes of direction. The thermoformable shell helps ensure a precise fit to the foot, while the moderate stiffness doesn't feel unnecessarily stiff. Players who train multiple times a week will particularly benefit from this blend of control, comfort, and mobility. The dynamic flex in the Achilles tendon area supports a more natural range of motion, which is particularly noticeable during deep strides and aggressive edge changes.

When selecting a pair, the narrow S width is important to ensure the fit matches the shape of your foot.
