The WINWELL PASSER WW 4-WAY is a passing drill tool designed for hockey training, specifically for repeated passing and rebound drills. The 4-Way design is particularly appealing to teams, coaches, and players who want to incorporate various passing angles into their training in a small space. Especially during technical training, a tool like this helps keep sequences flowing smoothly and ensures passes are received cleanly or relayed immediately.

- Product Type: Passing cone for hockey training
 - System: 4-Way design for multiple passing directions
 - Training benefits: supports passing drills, direct receptions, and reaction drills
 - Applications: Technical training at the club level, team training, and individual practice
-

Product information

- Construction: Designed to withstand repeated contact with pucks or balls during daily training

In training, it's often not just repetition that counts, but also the variation in angle, timing, and pass accuracy. That's exactly where the WINWELL PASSER WW 4-WAY comes in: Multiple passing directions make drills more varied and help create more realistic passing sequences than with a simple straight return pass. This is particularly useful for club players and coaches who need to structure technical drills efficiently and have limited time for elaborate setups.

Before use, it's worth taking a quick look at the playing surface and training objective to ensure the passer is suitable for the planned technical training with a puck or ball.
