Product information

BETTERHOCKEY GAME CHANGER brings stick-handling and reaction training to a clearly structured training area measuring 170 x 83 cm. The system is primarily designed for ambitious players and coaches who want to tailor their off-ice sessions to focus on speed, precision, and stickwork. With 9 game modes, it adds variety to training without taking the focus away from the actual technical work.

- Product Type: Interactive hockey training area
- Size: 170 x 83 cm
- Game modes: 9 different training modes
- Training Focus: Reaction, precision, speed, and quick hands
- How it works: light-activated target points with time-based exercises
- Exercise types: including Classic, Quick Hands, Toe Drag, and Lying 8
- Applications: Technical training off the ice or as a supplement to club training

In training, it's often not just repetition that counts, but also a clear challenge. That's exactly where this system comes in: fixed or changing target points demand precise puck handling under time pressure, while different modes specifically alternate between control and speed. This is particularly useful for players working on tight movements, quick hands, and precise timing, as well as for coaches who want to design varied technical drills without extensive setup.

Before use, it's worth taking a quick look at the available space so the training area can be seamlessly integrated.
