## Product information

---

The TRUE XC9 INT is a hockey stick designed for ambitious youth and club players who are looking for a direct, precise shot setup during practice and games. In this intermediate version with a right-handed blade orientation, 58 flex, and TC2.5 curve, the model is designed for players who want to combine a responsive feel with precise puck control.

- Technology: XCORE Gen 2
- Shooting Performance: Improved flex profile for easy loading and a quick shot release
- Blade Construction: repositioned insert in the center of the blade
- Control: enlarged sweet spot for smoother puck reception and more precise handling
- Curvature: TC2.5
- Hardness: 58
- Size: INT
- Version: right-handed, black

The optimized design really shines during high-tempo play: The stick loads more easily, saving valuable time on wrist shots or quick releases. At the same time, the significantly larger sweet spot helps you handle the puck more smoothly on first contact. This is a good fit for players who aren't just looking to finish plays but also want to make clean passes in tight situations and build up the play with control.

The intermediate size and 58 stiffness rating should match your height, strength, and playing style.
