2 in stock

Player hardness: 55
Stick length: 57inch
Color: black
Stock type: Right

Product information

Bends: TC2

Stick size: INT

TRUE CATALYST 9X INT is a lightweight hockey stick designed for ambitious youth and club players who are looking for a direct feel for the ball and their shots during practice and games. The Catalyst line is designed for light weight and combines this with a construction that doesn't compromise on stability and control.

- Technology: PLD, PASS, and BAT technologies in the blade
- Construction: Woven mesh to increase overall strength
- Kick Point: Mid kick point with flex in the mid-zone
- Control: Stiff taper zone for a precise stick feel
- Shaft shape: double-concave with square corners
- Grip: Soft, glossy grip
- Variant: Right-handed, INT, Flex 55, Length 57 inches, Bend TC2
- Color: Black with a matte face

On the field, this balance is particularly evident during repeated shots and quick passes: The flex in the middle of the shaft supports clean energy transfer, while the stiffer zone toward the blade keeps the stick stable. This balance really shines during regular training sessions, when a stick needs to feel light in the hand yet still respond reliably. The shaft shape provides clear orientation in the hands, which is noticeable during technical drills and direct shots.

The 57-inch length in INT with a flex rating of 55 is designed for players looking for a suitable intermediate option with a sporty feel.
