Stick length: 62inch
Player hardness: 65
Bends: 92
Color: black

Product information

Stock type: Right

Stick size: SR

The FISCHER RC ONE XPRO INT is a performance hockey stick designed for players who want to generate as much power as possible from every shot and pass. The one-piece construction is clearly designed for ambitious club players and performance-oriented athletes for whom a direct feel for the stick and a fast puck release are crucial.

- Product Type: High-end performance hockey stick
- Construction: one-piece for direct energy transfer
- Technology: aligned fibers for faster puck release
- Blade: Integrated carbon bridges to stabilize the blade
- Benefits: powerful shots and precise passes with direct feedback
- Variant: Right-handed, SR, stiffness 65, flex 92
- Length: 62 inches
- Color: black

On the ice, the difference is most noticeable during quick shots and passes under pressure. Because less energy is lost in the stick, this model responds directly and with responsiveness. The faster release helps the puck come off the blade cleanly, which is especially noticeable in tight game situations and in the offensive zone. At the same time, the stabilized blade provides stability in puck control and ensures a consistent feel during hard shots.

With an SR size, 62-inch length, and 65 flex, this model is particularly well-suited for adult players looking for a noticeably responsive hockey stick with a right-handed blade orientation.
