Stock type: Right
Stick size: SR

Product information

The FISCHER W300 ABS 23 R blade is an indoor hockey blade designed for players looking for a clear, familiar feel when replacing or customizing their stick. With a right-handed blade orientation, a 23 bend, and a black finish, this model is ideal for a competitive, direct playing style in training and everyday club play.

- Product Type: Indoor hockey blade
- Model: W300 ABS
- Curvature: 23
- Blade orientation: right
- Size: SR
- Color: black
- IntendedUse: Replacement or assembly of an indoor hockey stick

Especially during regular indoor training sessions, it's important to have a blade that fits seamlessly into your own playing style. The 23 bend falls within the range of a standard indoor hockey setup and supports clean ball control, precise dribbling, and controlled passes in tight spaces. The right-handed version is designed for players with the corresponding stick grip, while the SR size is intended for adults. This makes the W300 ABS particularly suitable for club players and coaches who want to complement an existing stick or restore it to playing condition.

When ordering replacement parts, the blade orientation should always match that of the existing stick and the player's usual playing side.
