Product information

Pants color: black

Pants size: S

Pants size 1: SR

TRUE CATALYST 9X4 is a pair of ice hockey pants designed for ambitious club players and regular training, where protection, mobility, and a lightweight feel must all come together. Available in black and size S / SR, this model is clearly intended for senior players.

- Product Type: Ice hockey pants
- Protection areas: Thighs, hips, and lower back
- Construction: High-density foam with hard plastic inserts
- Mobility: Ultra-lightweight design with an ergonomic fit
- Ventilation: Integrated ventilation system for noticeable air circulation
- IntendedUse: Training and games on the ice
- Color: Black
- Size: S / SR

On the ice, the difference is most noticeable when sharp changes of direction, deep squats, and rapid acceleration are required. The combination of a lightweight construction and a form-fitting design supports freedom of movement without making the pants feel unnecessarily bulky. At the same time, the protection in high-impact areas is designed to ensure the gear performs reliably during intense daily club activities. The ventilation system helps make the pants more comfortable to wear, even during longer sessions.

When selecting these pants—in addition to the senior model—it's especially important that the size and fit are properly matched to the rest of your protective gear.
