Adhesive tape colors: black

NAT DOUBLE-SIDED ADHESIVE TAPE is a practical accessory for everyday hockey use when you need to secure equipment, stick parts, or small attachments neatly and discreetly. The black version blends discreetly into the equipment and is particularly suitable for teams, coaches, and club players who regularly make quick repairs during practice.

- Product Type: Double-sided adhesive electrical tape
- Applications: Securing and fastening hockey equipment
- Function: Adhesive on both sides for flat application

Product information

- Length: 25 m
- Width: 19 mm
- Color: black

Especially in club settings, having materials that are quickly accessible and easy to use is essential. The double-sided adhesive version is ideal for situations where parts need not only to be wrapped but also directly joined together or precisely positioned. The 25-meter roll provides enough tape for multiple uses during training or in the locker room without having to constantly replace it.

At 19 mm wide, the tape can be unrolled with precision and works well even on smaller surfaces. Before application, the surface should be as clean and dry as possible.
