SILOPAD TUBE PADDING is a gel tube designed for pressure and friction points—such as those that can quickly become uncomfortable in hockey, particularly in shoes or when wearing tight-fitting equipment. The 4-inch version is ideal for targeted padding in areas where a little extra relief is needed during practice or on long game days.

- Product Type: Gel-tubing cushion
 - Size: 4 inches
 - Function: Soft padding to cover and cushion sensitive areas
 - Applications: Relief from pressure and friction during sports and daily life
 - Fitting: For targeted use on smaller, localized areas
-

Product information

- Package Contents: 1 piece

Especially with recurring stress in hockey, it's often not the entire equipment that causes problems, but a very specific spot. That's exactly what this tubular pad is designed for. The gel material wraps protectively around the affected area and can help make the pressure inside a shoe or under tight-fitting gear more comfortable. This is particularly useful for players who train regularly, as well as for parents who want to address minor pressure points early on in young athletes.

When selecting a pad, the most important factor is that the length and intended use match the affected area.
