Product information

- Uses: Hockey practice, game days, and everyday sports activities
- Variant: white version
- Usage: For personal hydration during breaks in play

The 1-liter capacity is a practical size for indoor and field hockey, allowing you to avoid constantly refilling the bottle between warm-ups, drills, and substitutions. The white version maintains a deliberately understated and unassuming look. For teams and coaches, this type of bottle is particularly useful when prioritizing simple organization and clear identification of equipment. For regular club training, having your own sports bottle is also a natural part of your gear.

Teams that use multiple bottles should ensure they are clearly labeled.
