In hockey in particular, proper lacing makes a noticeable difference in everyday play, because the shoe only fits snugly on the foot when the laces can be pulled through evenly and completely. At 244 cm, this version is particularly suitable for models that require more length—such as those with a taller design or numerous eyelets. For young players in a club, as well as for parents replacing worn-out laces, this is a straightforward choice without unnecessary extras.

Before making your selection, it's worth taking a quick look at the length you've used so far to ensure the laces fit your specific shoe or skate.
