Product information

Shoe size Europe: 45-46.5

SUPER FEET PRO SERIES HOCKEY PERFORMANCE insoles in EU sizes 45–46.5 are designed for ambitious ice hockey players looking for more stability and a more direct transfer of power while skating. Especially during quick bursts of speed, tight turns, and hard stops, a sport-specific insole for hockey often makes a clearly noticeable difference.

- Product Type: Insoles for ice hockey skates
- Technology: EVOLyte® stabilizer cap with carbon fiber
- Construction: Flybridge™ design
- Performance benefits: Support during acceleration, edge control, and energy transfer
- Applications: Tight turns, transitions, quick starts, and hard stops on the ice
- Size: EU 45–46.5

In games and regular training, it's not just the skate itself that matters, but also how stable your foot is inside the boot. That's exactly where this hockey insole comes in: The carbon-fiber stabilizer cap supports controlled foot movement, while the Flybridge™ design is engineered for a precise, direct skating feel. This is particularly beneficial for club players and performance-oriented skaters who want every movement to be cleanly transferred to the blade and into their push-off.

The size should match the skate being used in EU sizes 45–46.5.
