Product information

Accessory size: JR

SHOCK DOCTOR GEL MAX POWER CARBON JR is a mouthguard designed for youth athletes who need a secure fit and a noticeably more stable construction during hockey practice or games. The Gel-Fit liner conforms to the teeth and gum line, while the reinforced outer shell with a rubber exoskeleton provides additional structural support.

- Product Type: Mouthguard for hockey and other contact sports
- System: Gel-Fit liner for custom fit
- Fit: Moldable to teeth and gum line
- Construction: Reinforced outer shell with rubber exoskeleton
- Protection area: Mouth and teeth
- Age group: Junior
- Size: JR

For younger players in particular, it's important to have equipment that doesn't get in the way with every movement. The combination of an adjustable inner lining and a reinforced outer shell ensures a secure fit and a more compact feel than with simple single-layer models. This is especially helpful during regular club activities, when the mouthguard needs to stay securely in place during high-intensity play.

The junior size JR is suitable for youth players; for a proper fit, the selected size should match the player's age and dental structure.
