Product information

TRUE CATALYST 9X4 WHITEOUT INT REGULAR is an ice hockey skate designed for ambitious young players looking for a direct, fast skating feel on the ice. The one-piece shell construction is designed for an anatomical fit and closely follows the shape of the foot, ensuring that energy is efficiently transferred to the ice during push-off.

- Construction: one-piece shell with an anatomical shape
- Skatingfeel: designed for speed and modern agility
- Power transfer: direct stance for quick changes of direction and stable strides
- Intendeduse: performance-oriented training and competition in ice hockey
- Fit: R, Regular
- Size: INT, Skate Size 6
- Color: Whiteout, white
- Package Contents: Pair

Especially for young players, it's important to have a skate that provides stability from the very first step while still remaining flexible. The CATALYST's design supports a stable position in the boot, which makes a positive difference during takeoffs, edge changes, and tight turns. This makes this model particularly suitable for players who train regularly and prefer a precise, responsive setup on the ice without having to move up to a significantly higher price range.

When choosing, pay attention to the fit: This model comes in a regular width and in INT size 6.
