The EXEL XC AVENGER QBS BASKET is a basket for cross-country skis, designed for skiers who are looking for a specific replacement due to wear and tear or for use in snowy conditions. The S version, measuring 45 mm, features a compact design and is ideal for direct, controlled pole use on the trail.

- Product Type: Pole basket for cross-country skis
 - System: QBS
 - Intended use: Cross-country skiing
 - Size: S
 - Diameter: 45 mm
-

Product information

- Installation: Designed as a replaceable basket
- Package Contents: 1 pole basket

Especially during regular training, the basket is one of the parts of the pole that undergoes heavy wear over time. A perfectly fitting replacement maintains a consistent feel and ensures that pole performance remains predictable across varying trail conditions. The more compact 45-mm version is particularly useful when a more direct push-off and a light setup are required. The QBS system indicates that the basket is designed for a corresponding replacement or attachment system from EXEL.

Before replacing the basket, it's worth quickly checking whether the shaft and mounting system are compatible with the QBS basket.
