Product information

The CCM SK JS FT390 JR is a junior hockey skate designed for young players who value a direct feel on the ice and a stable base. Available in Skate Size 1, Shoe Size JR, and Width D Regular, this model is designed for young players who participate in regular training and games.

- Technology: ROCKETFRAME 3D technology
- Construction: lightweight composite boot with carbon sole
- BladeMount: SPEEDBLADE HYPER-GLIDE
- Blade feature: More resistant to damage and dulling
- Feel: Stable power transfer during dynamic skating movements
- Size: Skate Size 1 / Shoe Size JR
- Fit: D Regular

Especially in junior hockey, a well-balanced skate makes a big difference because technique, balance, and confidence in your footing are closely linked. The ROCKETFRAME 3D construction combines a lightweight feel with a sturdy structure, while the carbon sole transfers energy directly to the ice during push-offs. Added to this are the SPEEDBLADE HYPER-GLIDE blades, which are a great choice for everyday hockey due to their increased durability—especially when equipment is put through its paces regularly during practice and in the locker room.

The D-Regular fit is suitable for feet of normal width. For a smooth skating experience, the skate should fit as precisely as possible in both length and width.
