The ITAL SNOW DISK D/48F 90MM BLACK is a sturdy snow basket designed for trekking and hiking poles, and it really shines where standard baskets quickly reach their limits in deep snow. The 90 mm diameter provides a larger contact surface, so the pole sinks less deeply and can be guided more smoothly on snow-covered trails.

- Product Type: Snow basket for trekking and hiking poles
 - IntendedUse: Tours and hikes in deep snow
 - Function: Wide disc shape for greater buoyancy on soft ground
 - Training benefits: supports more stable pole use on snow
 - Size: 90 mm
-

Product information

- Color: Black
- Construction: Sturdy design for winter conditions

Especially on longer winter hikes or in changing snow conditions, a generously sized base makes a noticeable difference. The pole stays in contact with the surface better, which keeps your movement more even and provides greater control on strenuous ascents or in loose snow. This makes this model particularly suitable for hikers and trekking enthusiasts who want to use their poles reliably even off-trail.

When making your selection, compatibility with your pole system is the most important factor.
