The ITAL TREK DISC D/48F 50MM BLACK is a black disc wheel with a 50 mm diameter, which is particularly popular in hockey—especially for roller hockey or inline setups. Especially during regular training, it's important to have a wheel that matches your existing equipment and integrates seamlessly into your setup. The designation D/48F and the 50 mm diameter provide the key reference points here.

- Product Type: Disc wheel for hockey setups
 - Diameter: 50 mm
 - Model: D/48F
 - Color: black
-

Product information

- Applications: Roller hockey and inline hockey equipment, depending on compatibility
- Important for purchase: Select a wheel that matches your existing wheel and chassis configuration

With wheels of this size, the focus is usually on precise matching to the chassis, position within the skate, and the desired riding feel. For club players and teams that use their equipment regularly—not just occasionally—the look is less important than a harmonious combination of size and the right model. The black finish keeps the design simple and sporty, without distracting from what matters most.

Before making a selection, it's recommended to briefly check compatibility with your current chassis and wheel configuration to ensure the diameter and model fit together perfectly.
