plus Shipping

 **FREE SHIPPING** from **CHF 150** (except bulky goods)  
in Delivery between **Thu 29. Oct - Mon 02. Nov 2026**

More than 10 in stock

## Product information

---

SID ODOR-AID MAGNET PODS help keep hockey skates, gloves, and other equipment dampened by sweat drier and fresher between practice and games. Especially in everyday club life, when gear is often stuffed right back into a bag, a quick and easy way to control odors is particularly helpful.

- Product Type: Magnetic pods for moisture absorption and odor reduction
- How it works: Activated by pressure and friction
- Applications: Shoes, gloves, and similar gear
- Training benefit: Absorbs moisture while the gear is still warm
- Reusability: Can be reused after air-drying
- Package Contents: 2 pods per pack
- Note: Intended for equipment damp with sweat, not for equipment that is soaked through

In hockey, odors often develop where moisture remains in shoes or gloves after a practice session. This is exactly where the pods come in: placed inside immediately after use, they can absorb residual moisture, making it easier to care for your gear on a daily basis. This is especially convenient for players who have multiple ice sessions per week, as well as for parents who want to regularly dry their children's gear and keep it ready for use.

The pods work most effectively when placed in equipment that's still warm shortly after use.
