Product information

Protective paint: black

Protection size-1: JR

Body protection size: L

WARRIOR ALPHA PRO BLACK JR is a shoulder pad for young players in size JR that effectively combines protection, mobility, and a comfortable fit. Especially during regular practice and games, it's important that the equipment isn't bulky and moves with you during quick changes of direction, one-on-one battles, or when you're up against the boards.

- Cap Design: flat-profile, contoured shoulder cap design
- Protection system: compression-molded foam in key impact zones
- Protection areas: floating pads along the spine and sternum, removable abdominal protector
- Closure: flat-fitting straps that don't snag on the jersey
- Adjustment: adjustable strap lengths at the waist and biceps
- Ventilation: ventilated inner jacket for flexible, lightweight padding
- Size: JR / L
- Color: black

The design is engineered to provide protection in areas where contact frequently occurs during hockey play, without unnecessarily restricting upper-body movement. The flat cap design helps keep the shoulders slim, while the floating elements on the sternum and back better accommodate movements on the ice. For young players and parents looking for well-designed gear for practice and games, ease of adjustment in everyday use is also important: The straps can be neatly adjusted to fit the body shape and gear setup, and the ventilated inner jacket keeps the fit comfortable even during intense sessions.

For a proper fit, JR size L should correspond to the player's height and the rest of their protective gear setup.
