Product information

Shoe size Skate Size: 6
Shoe color: black
Shoe size: INT
Shoe width: R (Regular)

The CCM Vizion Regular INT is an ice hockey skate designed for ambitious players who seek a tight connection between their foot, the boot, and their movements on the ice. The highly thermoformable construction really shines during regular training: When heated, the boot can be precisely customized to fit, ensuring a snug fit and supporting direct power transfer with every push-off.

- Product Type: Ice hockey skate
- Customization: Highly thermoformable boot
- Fit: R (Regular)
- Construction: integrated, newly developed toe cap
- Forefoot area: more room without a bulky feel
- Size: INT, Skate Size 6
- Color: black
- Intended use: Training and games on the ice

In terms of skating feel, this model is clearly designed for players who don't view support and comfort as separate considerations. When the boot fits snugly, edge changes, acceleration, and pressure build-up remain controlled and responsive. At the same time, the integrated toe cap in the forefoot creates a bit more space, which can be especially comfortable during longer sessions on the ice without making the skate look bulky. Added to this is a modern, futuristic look that fits well with the model's technical design.

The regular fit is suitable for many mid-width foot shapes; when selecting a size, your INT size and Skate Size 6 should match your previous skate fit.
