Product information

Player hardness:	50
Color:	black
Bends:	P28+1/4
Stock type:	Right
Stick size:	JR

The CCM JETSPEED FT9 PRO JR is a composite hockey stick for junior players, designed for fast-paced play and a direct feel for the puck. Available in the JR version with a right-handed blade orientation, 50 flex, P28+1/4 bend, and in black, this model is aimed at ambitious junior players looking for a responsive stick for both practice and games.

- Technology: Hybrid kick point with a hinge effect for a balanced blend of shot speed and responsiveness
- Construction: ALUPLI Composite with aluminum layers and carbon fibers
- Shaft shape: Round "R" geometry with rounded corners and concave sides
- Blade: Dual-Control Blade with X-Soft heel
- Playing Feel: Designed for precise control and clean feedback upon puck contact
- Hand: Right
- Size: JR
- Stiffness and Flex: 50 / P28+1/4

Especially at the junior level, a balanced combination of flex, shaft shape, and blade quickly makes a difference. The hybrid kick point supports quick shots without losing the feel for the puck, while the rounded shaft geometry feels comfortable in the hand. The Dual-Control Blade is designed for control, which is helpful for receiving the puck, making short passes, and taking quick shots in tight spaces. The advanced composite construction is also designed to withstand the rigors of regular training.

When selecting a stick, the blade orientation, JR size, and stiffness level 50 should be appropriate for the player's height and current skill level.
